## 1. Qualitative Information on Quarterly Financial Performance

### (1) Explanation of Operating Results

The global economy continued to grow steadily throughout the consolidated first quarter. However, uncertainties about the future rose rapidly due to the impact of U.S. trade policy and other factors. In the U.S., imports of consumer and capital goods and capital expenditures increased temporarily due to a rush in demand leading up to tariff hikes. In China, stimulus measures boosted domestic demand; however, the economy remained at a standstill due to the prolonged real estate recession and sluggish investment climate. The Japanese economy showed signs of a moderate recovery as personal consumption ticked up with improving employment and income amid ongoing solid corporate earnings.

The Fujitec Group is implementing a new five-year medium-term management plan, Move On 5, which we launched in fiscal 2024. This plan encompasses the fundamental corporate changes we will pursue to achieve our underlying value. We recently revised our medium-term management plan in response to weakening market conditions in China. As announced in Notice Concerning Revisions to the Mid-term Business Plan, published on July 30, the revised version of Move On 5 calls for net sales of 283 billion yen by fiscal 2028, with efficiency gains leading to improved operating income of 44 billion and operating income margin of 15.5%. These revisions reflect our aim to achieve cross-organizational growth and efficiencies in every region and business. We established three pillars as a company-wide strategy to achieve these growth targets. The first pillar is *selection and consolidation of regions and business mix*. Under this pillar, we aim to improve profitability through clear strategic positioning in each region, defining the direction of efforts in each region and business. We launched sales of the new Ele Glance standard elevator for the Japanese market in April of this year. Compared to our previous mainstay products, we enhanced Ele Glance even further in terms of design, maintainability, and disaster prevention. We have made the main components of the product more compact and lighter, contributing to greater installation efficiency and resource conservation during production. The second pillar is *high quality and high profitability*. Here, we aim to improve margins through the collective efforts of the Fujitec Group while also enhancing quality, which is one of our strengths. In March 2025, we completed the construction of Wisdom Square, a quality evaluation facility for elevators and escalators, beginning phased operations in April. Wisdom Square is a quality-focused testing and verification facility designed to provide the highest quality products and services both in Japan and across global markets. Fujitec will strengthen the group-wide quality control system and sharpen our focus on quality—one of our core strengths. We are committed to delivering products and services that allow customers in Japan and worldwide to experience the high quality only a specialized manufacturer can provide. The third pillar is a *strong business foundation*, including the SDGs and other initiatives indispensable for pursuing these pillars. One of our keys to sustainability is respect for fundamental human rights. Accordingly, we formulated the Fujitec Human Rights Policy. This policy applies to all officers and employees of the Group and describes how we will fulfill our social responsibility as a company. To this end, we pursue efforts to respect fundamental human rights and build even stronger relationships of trust with our stakeholders. We established 18 subcommittees to monitor our progress in these three pillars. Each subcommittee reports progress at monthly management meetings, where issues are identified and response measures formulated.

As a result of these factors, the Fujitec Group recorded business performance for the three months ended June 30, 2025, as described below.

(Amounts less than one million yen are rounded down)

	Three months ended June 30, 2024	Three months ended June 30, 2025	Change (%)	Real change, after excluding the impact of foreign exchange (%)

Adjustments	(6,056)	(5,050)	—	—
Total	270,879	301,061	11.1	—

Orders for the New Installation Business in Japan rose year on year stemming from an increase in units and average unit price. Our Aftermarket Business saw year-on-year growth in both the number of modernization projects received and their total value. Repair work and maintenance for elevators and escalators also rose due to an increase in the number of contracts, contract price revisions, and a decrease in canceled contracts.

In terms of overseas orders, in East Asia, the New Installation Business saw an increase in orders in Taiwan, while the Aftermarket Business saw a decrease in modernization projects in Hong Kong. In South Asia, orders in the New Installation Business increased in Singapore and Indonesia, while the Aftermarket Business saw increases in all regions. In the Americas and Europe, New Installation Business orders increased mainly in the U.S., while Aftermarket Business orders increased in the U.S. and the U.K.

Profit attributable to owners of parent	3,897	3,862	(0.9)	—
Net income per share	¥49.95	¥49.49	—	—

Net sales for the consolidated first quarter decreased in East Asia, and operating income decreased in East Asia and South Asia. Other regions compensated for this decrease, however, leading to higher sales and profits year on year. Ordinary income and profit before income taxes decreased as formerly foreign exchange gains shifted to foreign exchange losses.

As a result, profit attributable to owners of parent decreased year on year.

The following information highlights performance by segment:

#### Japan

Both sales and profits increased year on year. Net sales decreased in the New Installation Business and increased in the Aftermarket Business. Operating income increased due to improved profitability in the New Installation and Aftermarket businesses, despite the impact of higher labor costs.

#### East Asia

Both sales and profits decreased year on year. Net sales decreased, despite increased sales in the Hong Kong Aftermarket Business. This decrease was mainly due to a decrease in unit orders and the impact of lower unit prices in the New Installation Business stemming from the real estate recession in China. Operating income decreased due to lower sales in the New Installation Business in China, despite the positive impact of a lower provision for losses on construction contracts in Hong Kong in the New Installation and Aftermarket Businesses.

#### South Asia

Sales increased and profits decreased year on year. Net sales increased due to the performance of the New Installation Business in Singapore and India, as well as an increase in the Aftermarket Business, mainly in Singapore. Operating income decreased due to weakening profitability in the New Installation Business in Singapore and Malaysia, as well as higher labor costs in India.

#### The Americas and Europe

Sales and profits increased year on year (sales decreased and profit increased when excluding the impact of foreign exchange). Net sales increased due to increases in the Aftermarket Business in the U.S. and U.K., despite lower performance of the New Installation Business in the U.S. due to construction delays. Operating income increased, supported by the impact of price revisions for maintenance work in the Aftermarket Business in the U.S., which more than offset the negative impact of weakening profitability in the New Installation Business and modernization projects in the U.S.

## **(2) Explanation of Financial Position**

Total assets as of June 30, 2025, amounted to 250,600 million yen, a decrease of 11,657 million yen compared with the end of the prior consolidated fiscal year. This result was mainly due to decreases in cash and deposits and notes and accounts receivable-trade, and contract assets, offset in part by an increase in securities.

Total liabilities amounted to 88,334 million yen, a decrease of 3,287 million yen compared with the end of the prior consolidated fiscal year. This result was mainly due to decreases notes and accounts payable-trade and provision for loss on construction contracts, offset in part by an increase in provision for bonuses to employees.

Total net assets amounted to 162,265 million yen, a decrease of 8,370 million yen compared with the end of the prior consolidated fiscal year. This result was mainly due to profit attributable to owners of parent of 3,862 million yen, dividend payments of 7,024 million yen, and a decrease in foreign currency translation adjustments of 4,588 million yen. Our shareholders' equity ratio as of June 30, 2025, was 59.1%, down 0.2 points compared to the end of the prior consolidated fiscal year. Net assets per share amounted to 1,898.03 yen, down 96.03 yen compared with the end of the prior consolidated fiscal year.

## **(3) Explanation of Consolidated Earnings Forecasts and Other Forecasts**

We have not made any changes to the consolidated earnings forecasts for fiscal 2025 (April 1, 2025 - March 31, 2026) as announced on May 14, 2025.
