

The “hu+gMUSEUM” is the museum of Osaka Gas Co., Ltd. (Osaka Gas). This museum occupies the site where the company was first established. Visitors to this five-story museum can see movies and experience various attractions, which showcase the benefits of natural gas. In this museum, four Fujitec elevators and eight Fujitec escalators were installed. In particular, the mirror finished escalators installed under the cube-shaped “hu+gVision” display complement the sophisticated atmosphere exuded by the atrium's spacious interior.
