

Building name

Wisma 46

Location

Jakarta, Indonesia

Completion

1996

Total units

Elevator 24

Wisma 46 is one of the most iconic office buildings in Jakarta. The building is a famous symbol of the business district and is shaped like a fountain pen. Wisma 46 is an office building featuring functions to support business needs, including a convention hall, meeting rooms, and virtual offices. The building also offers various banking services, delivery services, a clinic and restaurants.

(Green Building Council Indonesia GREENSHIP certification pending)

In this office building, nineteen (19) elevators modernized by Fujitec are in operation. Elevators delivered include 6 elevators that operate at a speed of 360 meters per minute, the fastest speed available at Fujitec Indonesia.

Fujitec delivered the original elevators during building construction in 1996, and has overseen maintenance over the years. The Wisma 46 elevators were renovated to improve safety and functionality, as the Fujitec elevators originally installed had been in operation for over 25 years. These elevators are the first at Fujitec Indonesia to introduce the EZSHUTTLE control system, which eases traffic from long elevator wait times. The EZSHUTTLE system assigns elevator cars to passengers automatically according to their destination floors, improving operation efficiency.
