Total units

Elevator 6
Escalator 10

LALA arena TOKYO-BAY is a large multipurpose arena located in Funabashi City, Chiba Prefecture. Being able to accommodate approximately ten thousand (10,000) visitors, this arena is used by the CHIBAJETS of the B. LEAGUE (Japan Professional Basketball League) and for various events such as music concerts, sports events, corporate exhibitions, etc.

In this multipurpose arena, Fujitec installed six (6) elevators and ten (10) escalators. The elevator near the entrance of the arena's lobby crowded by many visitors adopts a loading capacity of twenty-six (26) persons. This large-capacity elevator contributes to simultaneously carrying multiple wheelchairs/baby stroller users as well as individual passengers.

In addition, the specifications of the five (5) elevators other than the one (1) elevator located in the arena's backyard include the specification for the wheelchair persons. Owing to this inclusion, the accessibility of the wheelchair to the arena's facilities is secured as well as creating a space where anybody can enjoy the events of sports, etc. with Fujitec's transportation support.
