7

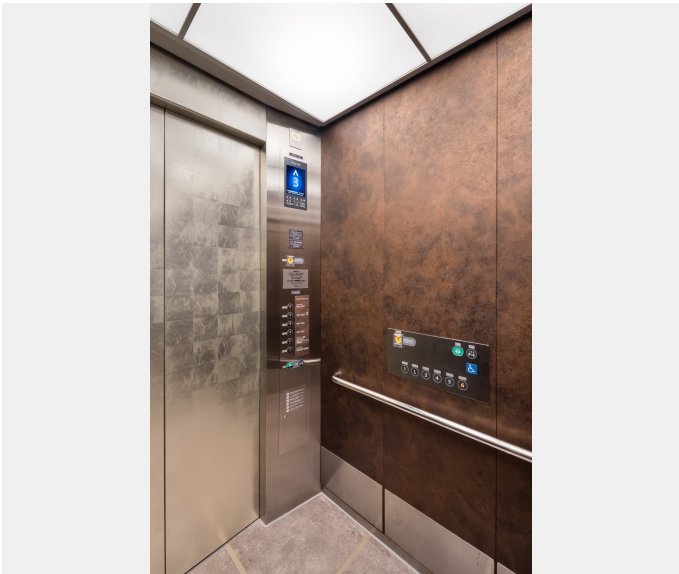

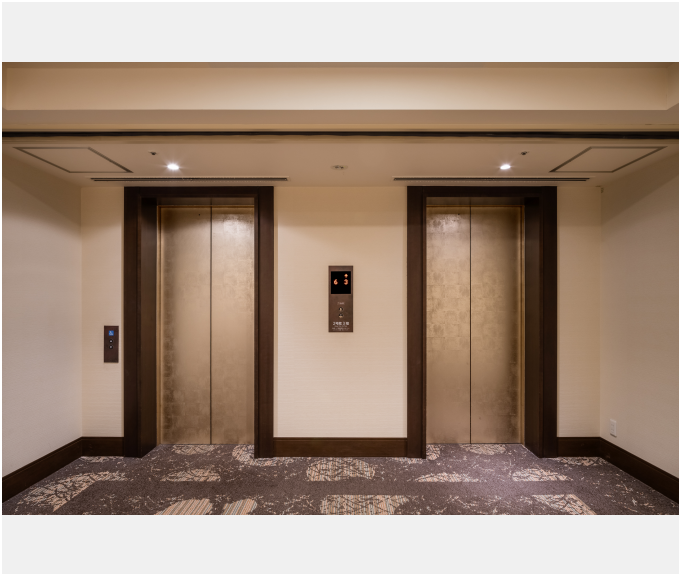

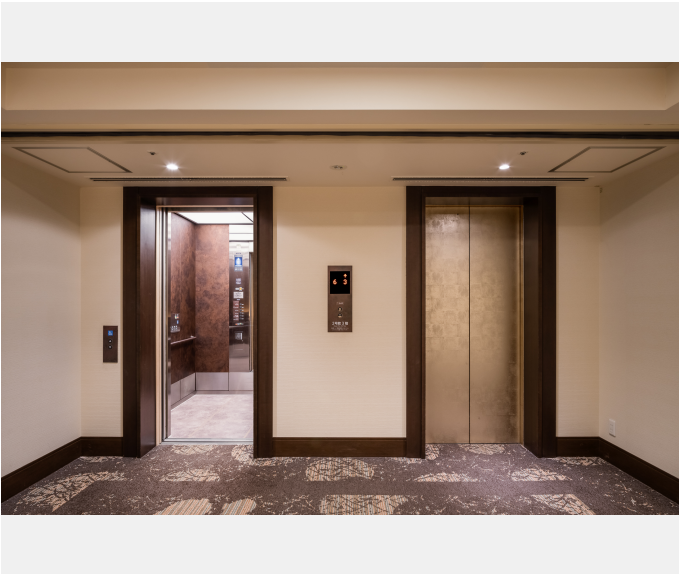

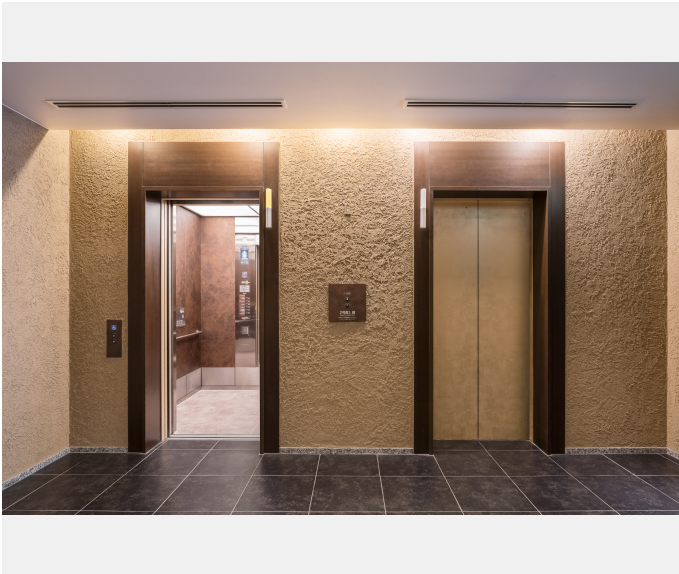

Hotel Harvest Hakone Koshien is a resort hotel situated in Sengokuhara, Hakone, Kanagawa Prefecture. Taking full advantage of its location surrounded by nature throughout the four seasons, the hotel features hot springs, a traditional Japanese garden, and spacious guest rooms, and is well-loved as a destination where guests can enjoy a relaxing stay.

Fujitec carried out a control system renewal for the seven (7) elevators that have been in operation since the hotel's completion. By retaining the existing indirect lighting design on the elevator ceilings, a soft and restful atmosphere is created. In addition, touchless "Air Tap" buttons have been adopted to enhance hygiene and provide guests with a comfortable and reassuring environment. By improving the comfort and convenience of the existing elevators while preserving their established design, the renewal contributes to a more comfortable and 安心な stay for guests.
